

The University of Minnesota has developed a free, easy-to-use [Logic Model Builder](#) that aligns with USDA/NIFA requirements and is intended to help potential projects develop strategic actions and timelines for accomplishing the objectives of the grant. This is a great first step in project planning!

It consists of 13 Steps for clearly outlining a project's Needs & Assets, short and long-term results, indicators, and analysis, as well as including data sources and collection methods.

[Register](#), choose [Logic Model](#) from the CYFAR Suite, and watch a short video on [How to Build](#) your own!
